

realMLS RESO Residential Income Listing Data

realMLS is excited to provide you with new and improved Listing Data that is in compliance with the RESO (Real Estate Standards Organization) Data Dictionary. This transition promises to provide a more efficient and better experience when working with Listing Data. The data will be more streamlined, up-to-date with industry terms and technology, and compliant with standardized naming formats—all while retaining essential local market nuances.

This document will provide details on each of the new fields that will now be part of the Residential Income Listing. There is also a second document that details the actual conversion of the data and how it was either moved, renamed, or removed.

What Does This Mean for You?

By committing and converting the listing data to RESO standards you will benefit by:

Time and Cost Savings: One of the primary advantages of realMLS's RESO conversion is the potential for substantial time and cost savings. The move to standardized data makes it quicker, easier, and more cost effective to implement your customized tools for IDX or Back office Platforms, etc.

Enhanced Search Capabilities: The realignment of the listing data to RESO standards will improve your ability to search across property types such as searching for both Residential Income and/or Rentals simultaneously. This enhanced searching capability enables you to better serve your clients and gain a more comprehensive view of the market.

Data Sharing: By adopting standardized data practices, realMLS can quickly and seamlessly share data with other MLSs in our market area and beyond.

Clear and Meaningful Data: You will find that the listing data is presented in an easy to find format and grouping. No more sifting through obscure titles for buried information. This helps your customers to read the listing information and for you to find their listings.

And the best part is you will not have to learn a whole new MLS system, just familiarize yourself with the new listing input sheets for data entry and searching.

The following page showcases a few examples of functions undergoing slight modifications and offers tips on navigating the updated data system.

Although there are no new features to master in Flexmls (i.e., no changes to Search, Add Listing, etc.), there are a few important items to note:

1. **The Add Listing program will be enhanced** for a more streamlined and cohesive data organization. Some data fields may not be displayed if they are irrelevant. For instance, if Waterfront YN is marked as 'N,' the Water Front Footage field will not appear as an option.
2. **Region is being retired.** The concept of Regions, and even Areas, is very dated since most users (both members and consumers) use maps to indicate a specific geographic location. Areas will remain the same.
3. It is **highly recommended that you search using the Maps.** You do not want to miss any information from the data share and using the maps ensures you the most accurate and best results.
4. **Check your Saved Searches.** Most of the items in the Saved Searches will automatically convert to the new RESO criteria. However, there is one data selection that could not be converted correctly and is being phased out. **“Parcel Size” with acreage expressed as a range is being replaced with “Lot Size Acres” which is looking for the exact acreage.** Parcel size will eventually become obsolete as more data is populated in Lot Size Acres and will subsequently be removed.
5. **Duplex, Triplex, and Quadraplex have been moved to Residential Income.** Be sure to double check any Residential Income Saved Searches to be sure the correct Property Sub Type is selected. Also, be sure to check this same data if that field is in any Residential Income Income Saved Searches as these are now the only three Property Sub Types available.

This is a summary to date of some of the more prominent changes you may notice while using the MLS system after the data is converted to RESO Standards. realMLS will continue to update any documentation should there be changes.

The following pages will detail all new data selection and their definitions and/or link to their RESO definition.

First, a list of all Residential Income Main Fields (fill in the blank) highlighting the new options.

Second, is a list of all Residential Income Details (the multi select check box fields) featuring new Details and links to their RESO definitions.

Residential Income Sub-Types

<u>Pre RESO Conversion Type of Dwelling</u>	<u>Change If Applicable</u>
Single Family-Detached	Removed
Single Family Attached	Removed
